SUMMARY

React.js developer with internship experience building responsive web applications and integrating REST APIs. Built and deployed CodePilot-AI, a full-stack code review platform (React, FastAPI, PostgreSQL) that combines static analysis with the Google Gemini API. Comfortable across the stack, with a focus on clean, reusable React components and fast, responsive interfaces. Uses AI-assisted tools (Cursor, Antigravity, Claude) to ship faster while reviewing and testing all generated code. BE in Artificial Intelligence & Machine Learning (2026). Open to on-site or hybrid roles in the Mumbai region.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
Backend & APIs: Python, FastAPI, Node.js, PHP, REST APIs, JWT Authentication
Databases: MySQL, PostgreSQL, MongoDB, SQLAlchemy
AI: Google Gemini API, LLM API Integration, Machine Learning
AI-Assisted Development: Cursor, Google Antigravity, Claude (prompting, code generation, debugging, code review)
Tools & Deployment: Git, GitHub, Postman, VS Code, Vercel, Render

EXPERIENCE

Software Developer Intern | Vedant Info Edge India LLP

Nov 2025 – Feb 2026

- Built responsive, user-friendly web interfaces with React.js, JavaScript, HTML5, CSS3 and Bootstrap, keeping the UI consistent across devices.
- Integrated REST APIs between frontend and backend to power dynamic content rendering and data exchange.
- Designed MySQL schemas and managed databases to support efficient CRUD operations.
- Debugged and optimized existing code to improve performance and reduce runtime errors.
- Worked in an Agile team using Git and GitHub for version control, code reviews and iterative feature delivery.

PROJECTS

CodePilot-AI — AI-Powered Code Review Platform | Live Demo | GitHub

React.js (Vite), JavaScript, FastAPI, Python, PostgreSQL, SQLAlchemy, Pydantic, Gemini API, Pylint, JWT

- Built the React.js (Vite) frontend where developers upload Python files and view combined static-analysis and AI feedback on bugs, security risks, complexity and maintainability.
- Connected the frontend to FastAPI REST endpoints, with JWT-based authentication and protected API routes.
- Combined Pylint output with Google Gemini API responses on the backend to generate intelligent code review reports.
- Designed PostgreSQL schemas with SQLAlchemy and validated requests/responses with Pydantic.
- Deployed the frontend on Vercel and the backend with PostgreSQL on Render.

Personal Portfolio Website | Live Site

React.js, JavaScript, HTML5, CSS3, Vercel

- Designed and built a fully responsive portfolio with reusable React components to keep the design consistent and content easy to update.
- Set up continuous deployment from GitHub to Vercel so every push updates the live site automatically.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Machine Learning

Savitribai Phule Pune University | 2026
